**Flipgrid**

IES SAN SEBASTIÁN

**Empower your students voice**

# What is Flipgrid?

At its most basic, Flipgrid is **a video tool that allows teachers to post "Topics" (grids) that are essentially short videos with some accompanying text**. You can even add a co-lead or share it with members abroad. This is then **shared with students,** who can be prompted to respond. The response can be made using the software's camera to create videos that are then posted to the original Topic. They can add overlaying photos, emojis, and text as **Stickers** on their video video.

**Here is how I use it in my English classes:**

My four **groups** are displayed, and within every group there are different **topics** in relation to communicative situations: **Introducing yourself**, **customer complaints** on the phone, **Elevator Pitch** and so on.

Students can either record a video on their **PC** or use the **mobile app.**

Find the Flipgrid
App and Download

FLIPGRID.

You can also use it at **in-site/ off-site** events with your colleagues (**teachers**) at school: **Erasmus Plus workshops.**

KA 226 We are Ready for Digital World
**PROS**

Appealing
Easy to use
Collaborative tool
Different  assessment tool
Build students' listening and speaking skills
Gives shy students a voice
Teachers view the videos prior to post

**CONS**

Students could make inappropriate responses
Rubrics are very basic
Not immediate feedback
